## Introduction

This programme has aroused among the student youth an awareness of the realities of life, a better understanding and appreciation of the problem solving of people. The overall aim of NSS is to give an extension dimension to the higher education system and orient the student youth to community service while they are studying in educational institution. The educated youth who are expected to take the reins of administration in future are found to be aware of the problems of the villages/slum community and in certain cases are different towards their needs and problems. Therefore it is necessary to arouse the social conscience of the students, and to provide them an opportunity to work with the people in the villagers and slum dwellers will expose them to realities of life and bring about a change in their social perception.
