A fully equipped seed processing plant with pre-cleaner, seed grader, indented cylinder, 2TPH capacity gravity separator, seed dryer, destoner, seed treater and mistomating auto weighing machine *etc.*, is established under the Mega Seed Project on “Seed Production in Agricultural Crops” since 2008 at old campus of the university. This is financially assisted by ICAR- Indian Institute of Seed Science, Mau. Processing of breeder/foundation/certified/TL seed of various crops is the major activity. Apart of this centre is providing hands-on training and technology dissemination to the farmers, rural youths and students for quality seed production of field crops.
